1. Relation ship between allele frequencies and genotype frequencies is gliven by $f(G_{11}) = P ; f(G_{12}) = q$ $f(G_{11}G_{11}) = P^{2} ; f(G_{11}G_{12}) = q$ $f(G_{11}G_{11}) = P^{2} ; f(G_{11}G_{12}) = q$ $f(G_{11}G_{11}) = P^{2} ; f(G_{11}G_{12}) = q^{2}$

2. Unoker random morbile, genotype frequencies and allek frequencies stay constant from generation to the hest one.
